

Remarks

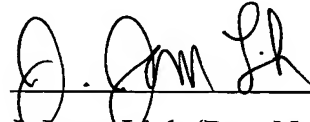

Applicants submit this Second Preliminary Amendment for consideration in the present application. A first Preliminary Amendment was filed with the application in which method claims were cancelled due to the present application being a divisional application.

Claims 43-62 are pending in this application, claims 19-42 having been cancelled, without prejudice by the foregoing amendment, and claims 43-62 having been added by the foregoing amendment. Applicants have added new claims 43-62 in order to better clarify and claim features of the present invention. Support for new claims 43-62 can be found in the specification generally at pages 8-19 and in the claims as originally filed, among other places. As the foregoing amendments are voluntary, the range of available equivalents should not be limited. The amendments place the application in better condition prior to examination and add no new matter.

A favorable Office Action is respectfully solicited. The Examiner is respectfully invited to contact Jason Link at 336.607.7443 or Steven Gardner at 336.607.7483 to discuss any matter relating to this application.

Respectfully submitted,

Date: November 4, 2003
